

PRESCRIBE PEACE OF MIND

Between 2019-2020, 9.5 million people misused prescription opioids.¹
Every day, over 1,000 American kids misuse opioids.²

As a dispenser of controlled substances, we need to take a stand on this, which is why we are arming you with the Deterra® Drug Deactivation and Disposal System. Developed under federal contract, Deterra is independently tested and proven to permanently and irreversibly deactivate, destroy and properly dispose of drugs, making them non-retrievable for all practical purposes. Additionally, they're easy to use and safe for the environment.

A large contributor of misuse – improper disposal of prescription and OTC medications – can be one of the simplest to fix. Please begin handing out Deterra and the Deterra Bilingual Consumer Trifold with every controlled substance and make it available for purchase at your POS.

We've found that not enough people are talking about safe disposal, but this simple pouch will help you start the conversation with your customers.

SAFELY DISPOSE OF UNUSED PRESCRIPTION MEDICATIONS

The Deterra Drug Deactivation and Disposal System is a simple, environmentally safe way to get rid of unneeded drugs.

WHY DO WE NEED SAFE MEDICATION DISPOSAL?

- Over 40 people die every day in the U.S. from a prescription opioid overdose, according to the CDC.¹
- More than 60% of people with leftover prescription opioids keep unused pills instead of disposing of them.
- Most misused medications are taken from friends and family.²
- Destroying medications with Deterra keeps children, pets and others safe from accidentally obtaining them from home.
- Properly disposing of unneeded drugs helps prevent them from being misused.
- At-home drug deactivation and disposal helps keep unused medications out of the home.
